## COMPACT, AUTO-FEED, RUGGED METAL TAG EMBOSSE

Designed specifically for the industrial user, the **ME1500S** is a rugged, reliable and a cost effective solution for the production of embossed metal plates and tags for asset ID and work in progress in the harshest environments. With a 15% increase in production speed, a completely renewed design and new advance features, the **ME1500S** is an advanced heavy-duty desktop solution that can be integrated into any existing factory and office network.

### 7" color touchscreen display with high resolution

The **ME1500S** is equipped with a built-in 7 "WVGA LCD touchscreen display with simple and easy to use icon and buttons. The user can access and manage machine functions through a multi-level menu in an easy and intuitive way. The configuration of the machine can be protected by password for high security and data protection.

### IoT (Internet of Things) remote access and management

- **Web services:** The machine set-up and operations can be entirely managed remotely via the web or through the use of VNC (Virtual Networking Computing) client, using a personal computer or other devices connected to the Customer's network.
- **Data transfer:** Data import/export and the machine updating can be managed from any device connected to the embosser via Ethernet by using the FTP protocol (file transfer protocol).

### USB (type A, type B), Ethernet and WiFi

The **ME1500S** can be connected to a personal computer, to load data and start production, or to another device, such as keyboard, barcode reader or other if needed.

User-friendly, versatile and designed specifically for the asset ID and work in progress tag identification needs of mid-size manufacturing, power, utility, oil, gas sectors.
